

5/10 DIGIT KEYPADS

Keypad Accessories

The 5/10-digit keypads are designed to enable control over applications such as: driver identification, Immobilizer, panic-button and trip-type setting.

Buttons are made of silicon and can be customized and replaced for additional uses.

Both keypads can be used to set up to 500 different codes for driver identification; 3 trip-types (for example work/private/weekend)
